ABSTRACT

Tool Hub is an attempt to take the advantage of internet for users providing different types of tools and software. It is accessible to personal computer as well as smart phone also. The user will get the services providing software at one platform.

Objective of the project is to make a website with mobile-first approach. 'Tool-hub' aims to download and buying software, tools at one place without visiting individual website and making multiple accounts in different website. Tool-hub is a B2C based website with user-friendly UI. We gather different types of software and tools based on daily use into our database. Tool-Hub makes it available to the user by fetching them using PHP. Making Mobile friendly is a difficult task, but Tailwindcss make it easy as it uses Mobile-First Approach.

ACKNOWLEDGEMENT

I am highly grateful to **Dr. Suksham Ahluwalia** Principal, Arya College, Ludhiana, for providing this opportunity to carry out the present project. The constant guidance and encouragement received from my supervisor, **Prof. Shairy** Assistant Professor in PG Department of Computer Science, Arya College Ludhiana has been of great help in carrying out the present work and is acknowledged with reverential thanks. Without the wise counsel and able guidance, it would have been impossible to complete the project in this manner.

I would like to express thanks profusely to **Dr. Rama Bansal**, Head of PG Department (Computer Science) for stimulating me time to time. I would like to thank to entire faculty and staff of Computer Science Department. I also thank my friends who devoted their valuable time and helped me in all possible ways towards successful completion of this work. I am also thankful to the authors whose work I have consulted and quoted in my project work.

Lastly, I would also like to thank my parents for their years of unyielding love and encouragement. I will always admire their determination and sacrifice during my project work.
